Subject: Statistical Analyst

Hey, can you help to circulate this in your dept? Thanks!

Statistical Analyst

The Duke-NUS Graduate Medical School has an immediate opening for a Statistical Analyst. This person will work on genetic data analyses related to genetic studies of human complex diseases with an international team of researchers. He/She must be familiar with statistical methods and be willing to learn new analytical methods, non-commercial software, and prepare summary reports and scientific publications. Flexibility in using a variety of computer platforms is necessary.

Requirements

- Master's or higher degree in Mathematics, Statistics, Epidemiology or equivalent scientific discipline.
- Those with programming knowledge (Linux script, Perl, C/C++, etc) and working knowledge of a standard statistical analysis package (R, SAS, etc) will be preferred.
- Good communication skills and able to work independently.
- An understanding of Genetics will be useful.
- Previous experience in statistical genetic analyses is an advantage, but not a requirement.

best,
Liang

The cure for everything is salt water; be it sweat, tears, or a swim in the ocean.
