Program Director

School of Computing, National University of Singapore

Job Descriptions

The National University of Singapore invites applications for the position of Program Director in the School of Computing (SoC). This appointment is pursuant to the formation of the National Cybersecurity R&D Laboratory (NCL) that provides experimentation environments and other security services for the local cybersecurity R&D community. The Program Director leads a team of IT professionals, and works closely with the research groups, to buildup the center capability, to provide security services, and to position the research center as a major collaborative platform for local cybersecurity R&D community.

Duties and Responsibility

• Works with the research groups to identify and prioritize essential services to be provided.
• Leads and manages the engineering teams to buildup and develop the center capability.
• Plans and establishes workflows/procedures pertaining to the center operations.
• Oversees the infrastructure deployment & maintenance and center operations.
• Ensure fair and transparent governance of the shared infrastructure and resources.
• Liaises and maintains strong relationship with internal and external stakeholders on various administrative issues.
• Interacts with research community and helps to expand the center user-base.

Requirements

• Post-graduate degree in Computer Science or related fields. PhD desired but not necessary.
• At least 12 years of relevant working experience.
• Proven track record and experience in leading large R&D projects, preferably in the area of cybersecurity.
• Excellent people management and communication skills, and have the ability to work with academicians, industry partners and government officials.
• Candidates who are familiar with the local cybersecurity R&D community will have an advantage.
