

## Tutorial for week 9 (Mar 6, 2002)

March 2, 2002

The following questions will be considered during the tutorial sessions on Wednesday...

**T6Q1:** Research the root pane that comes with every highest level container in Java Swing. Briefly describe each of its components and state what each could be used for.

**T6Q2:** Give layout management code for the following:

**T6Q3:** Give code for a small menu-style application which makes the console beep whenever a menu item is selected.
