Dear Dr Wong,

**ICAAS-NLB Life Sciences@the Courtyard Series**

It has certainly been a rewarding 2-year partnership, between NLB and ICAAS, in bringing the Life Sciences to the community.

We were pleased to have the tremendous support, professional resources and industry endorsement brought on board by ICAAS, making it possible to bring this progressive subject to a wider audience, in an accessible and affordable way.

Thank you for your gracious comments on our staff and services. We strive to be a world-class service provider and this successful thematic series - Life Sciences @the Courtyard - has to date benefited over 2000 attendees and feedback has been both substantial and favourable, with many more organizations offering such talks to meet the growing demand. My staff have also expressed that it has been thoroughly enjoyable experience managing this series to encourage further learning.

Although, it has come to a natural close, having achieved a level of awareness and public education on the subject, and with preparations underway for the National Library's move to its new premises, we would welcome opportunities to further our fruitful partnership with ICAAS and certainly look forward to future collaborations.

Sincerely,

Christopher Chia (Dr)  
CE, NLB
