Warning

Make sure you are viewing the correct slide deck that is applicable to the semester for which you are considering starting UROP, as requirements may change.

This deck is for AY 16/17 Sem I, presented on 12 Oct 2016, for prospective UROP students starting in Dec 2016.
NUS SoC UROP Briefing

AY 2016/2017 Sem I

Presented by Kan Min-Yen @ SR2
Assisted by Mrs Kwek Wong Kay
(Revised 12 Oct 2016)
Objective

Allows undergraduates to participate in active research and to experience first hand the challenges and exhilaration of research, discovery and invention.

Typically, research involves these activities:

- Problem formulation;
- Literature survey;
- Attending research seminars;
- Proposal and implementation of solutions and their evaluation; and
- Documentation and presentation of results.
UROP @ SoC

Modules
- CP3208: Undergraduate Research in Computing I
- CP3209: Undergraduate Research in Computing II

Prerequisites
- Completed at least 60MC
- Minimum CAP of 3.8
- Approval of CS/IS department

Two Options
- 2 semester UROP: CP3208 & CP3209 (8MC)
- 1 semester UROP: CP3208 (4MC)
  - Can be done during summer (special term)
  - Can continue with CP4101 (Final Year Project)
Evaluation - CP 3208/9 Track

50% Continuous Assessment (Supervisor)

- 5% Written literature review or tutorial presentation (CP3208, around Week 8)
- 5% Written progress report (CP3208 end of semester)
- 10% Oral presentation of progress to supervisor/research group (CP3209, around Week 8)
- 30% Understanding, formulation and execution, as demonstrated throughout the project and in the progress/final reports (CP3209, end of semester)

50% Final report and oral presentation

- Two independent examiners

You get the same grade for both modules at the end of the entire project; after the end of CP 3208, you will receive an IP grade (“in progress”) that will be changed to your actual grade after the final report in CP 3209.
Evaluation - CP 3208 Track

50% Continuous Assessment (Supervisor)
- 10% Written literature review or tutorial presentation (Around Week 8, or halfway through special term)
- 40% Final Report and Overall Performance (40%) (End of semester)

50% Final report and oral presentation
- Two independent examiners
Schedule (Sem I AY16/17)

13 Oct 2016: UROP applications open
- Put in your application form to the Undergraduate Office (Mrs Kwek)
- You will be informed when it is approved
- Once approved, get the project assignment form signed by your supervisor and hand in to Mrs Kwek

It’s recommended that you do both simultaneously

17 Nov 2016: UROP application close
Finding Projects

Approach the faculty!

- Browse UROP project list at [https://mysoc.nus.edu.sg/~projadm/](https://mysoc.nus.edu.sg/~projadm/)
- You should look through FYP projects and ask the faculty to propose something similar.
- Talk with any faculty that whose area is of interest to you.

You can also propose your own project. You will still need to find a professor to supervise you.

Support

We provide the following for each UROP student:

- B&W paper quota 50 pages
- Colour paper quota 20 pages
- A1 Poster

See [https://docs.comp.nus.edu.sg/node/1732](https://docs.comp.nus.edu.sg/node/1732)

In addition, each project is given a budget of $50 for small items (claim through supervisor with receipts)
Exemptions

- For **Computer Science programme**, only students in the Turing Programme are allowed to replace CS3201/CS3202 Software Engineering Project or CS3281/CS3282 Thematic Systems Project with UROP CP3208/CP3209, under the restriction that the project contains significant programming content (subject to approval of UROP coordinator).

- For the **Computational Biology programme**, CP3208/CP3209 is allowed to replace up to two level-3 electives under the restriction that the UROP project must in the computational biology area (subject to approval of UROP coordinator).

- For **University Scholars Programme** students that matriculated in 2012/2013 only, you may read UROP modules CP3208/CP3209 in place of the two Computer Systems Team Project modules (CS3201/CS3202 or CS3281/CS3282). CP3208/CP3209 are independent study modules (ISMs) and they will also be counted as two of the four Advanced Scholars Modules (8 MCs).

  **N.B.** USP students matriculating 2013/2014 or later cannot apply this rule.

To apply these exemptions to your case, please approach Mrs Kwek in the Undergraduate Office for the relevant waiver forms.
“UROP is an interesting opportunity for undergraduates to extensively explore and gain insight into a particular topic of Computer Science. Doing UROP also helps us to have a rough idea of what research in CS is like, and to improve many skills, such as problem solving, communication and writing”

Mr Nguyen Truong Duy

**Computing Bounds on Quantum Probabilities**
Winner of Outstanding Undergraduate Researcher Prize for AY12-13
Supervisor: Dr Stephanie Wehner
“UROP gives me the opportunity to work on an exciting cutting-edge research project. I really enjoy the meaningful experience working on the project. For those who loves challenges in doing research, UROP is the way to go.”

Mr Harta Wijaya
FAQ and Issues

Q: In CORS, there is a slot for UROP lectures. What is that and what happens if it conflicts with another module?

A: For NUS modules, we sometimes have to create “dummy” modules to allow the timetabling system to mount the course. Don’t worry, there are no UROP lectures. If you find that another course conflicts with it, we can manually register you for UROP (if the UROP application was approved) bypassing CORS; please approach the UROP administrator in the undergraduate office.

Q: Is the UROP graded on the final report that we submit to the digital library at the very end of the UROP, or it is based on the report we handed in for examination? If the reviewer suggests edits then are they compulsory and accounted for in the final grade?

A: Your grade for UROP is partially based on the report that you turn in to the examiners. Unless otherwise communicated to you by your examiners or supervisor, further changes to the thesis for the archival copy in SoC’s digital library are not considered for your grade.

Q: I heard that hardcopy is no longer required for the reports. Is that true?

A: Yes. As announced on the News part of the UROP website, the workflow for reports has been recently revised such that students need to distribute their report directly to the examiners in softcopy by default. If an examiner requests hardcopy, you will be required to furnish it. The report will still need to be uploaded to IVLE for timestamping purposes.

Q: Are exchange students allowed to take part in UROP?

A: Yes, exchange students can take part in UROP. Typically since exchange is for a single semester, UROP I can be completed. Exchange students wishing to participate in UROP will need to discuss their particular schedule with their prospective supervisor.

Q: What happens if I decide to change or drop UROP part way?

A: You’ll have to defend the part of UROP that you did complete. For example, if you originally opted to do a year-long UROP, and finished UROP I, but decide to drop UROP II, you will have to defend the UROP I as your final project. Such outcomes usually do not favor the student well, so we suggest that you make a full commitment towards finishing your UROP project.
