This write-up is meant for both students doing CP3208 and those on the CP3208-CP4101 track.

The CP3208 length of the literature review should be between 6 to 10 pages.

Read [http://www.utoronto.ca/writing/litrev.html](http://www.utoronto.ca/writing/litrev.html) to find out what literature reviews should and should not be.

You may want to check with your supervisor on the best way to do a literature review in your research area.

You should submit one hard copy to your supervisor and one soft copy to the IVLE Workbin by the deadline given.

Alternatively, if your supervisor agrees, you may choose to give a presentation in place of doing a written literature review. The presentation should be in the form of a tutorial appropriate for an undergraduate audience and publicized to the undergraduates in SoC e.g. through the SoC Forum. In this case, you should submit a soft copy of your slides to the IVLE Workbin in place of the literature review report.
