

# Who am I?

Tan Matthew Simon Castaneda

- Y3 CS doing a second major in math
- Enrolled in NUS College
- President of NUS Computing Club
- Avid RAG enjoyer
- PGP Mala specialist

## My experience in CS

- Introductory modules were a huge time sink
- Fun if you do it with friends
- Impossible to like every single module you take, but just double down on the ones that you like
- Experience is very different module to module
- Not perfect, but that's the same with everything

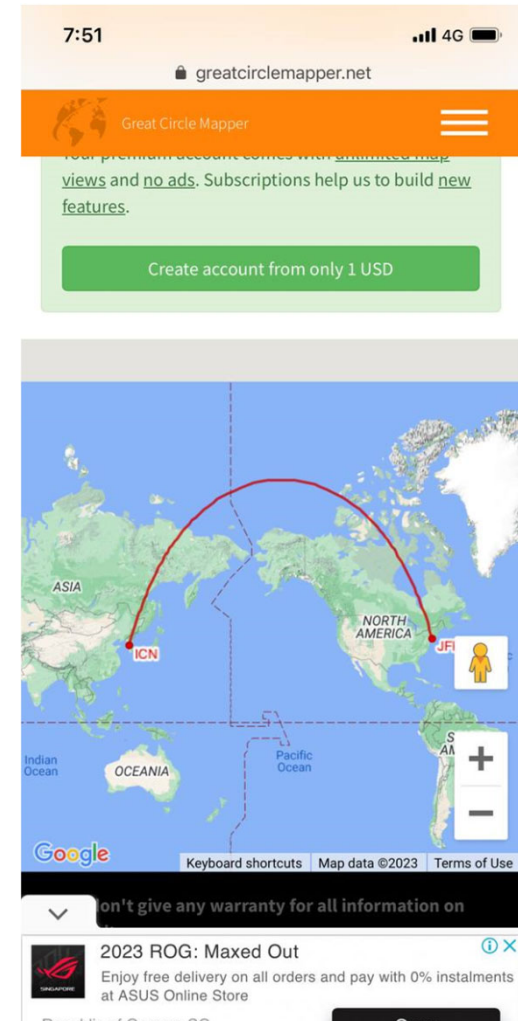

## Uni and life in SoC to me has been about

- Priorities
- Milking experiences
- Finding out what you like, or at least ruling out what you don't like
- Your education is to serve you, not the other way around

# Overseas experiences

- Depends on which you chose
- Did one with NUS college as opposed to SEP/NOC

Join me in putting the club in comp club!!!

**Can you walk in a straight line?**
