Course Logistics

Design and Analysis of Algorithms

- There will be problem sets (nearly) every week, four assignments, one midterm exam, and one final exam. The problem sets will be worth 10%, the assigments 20%, the midterm 35%, and the final 35% of your final marks.

- The problem sets are mainly for your benefit, and they will be "softly" graded, meaning that we will mainly check whether you have made a decent attempt. On the other hand, the assignments will be graded more rigourously.

- The problem sets and assignments will be made available on the Piazza site. Please submit your solutions to iiscdaa2016@gmail.com. We encourage you to LaTeX your writeups but it's not required.

- We encourage you to discuss problem set and assignment questions with your classmates, but make sure that the final writeup is in your own words. Plagiarism will be strictly dealt with.

- The midterm will be on October 7.
