A. GUIDELINES FOR INTERPRETING THE REPORT

The teacher evaluation report is for developmental purposes and is meant to help identify strengths and areas for improvement. Please consider the following recommendations that will aid in interpreting the results:

1. Examine the report by taking note of patterns in order to consider how best to act on the feedback your students have taken the time to provide. Use the reflection section at the end to reflect upon how you might act on the feedback.
2. These evaluations stem from student perception and thus constitute one source of evidence among others as to the quality of your teaching. Any response to the feedback should be based on the most representative results rather than on outlying responses.
3. Upon getting a general sense as to what has gone well, and which areas may require attention and improvement, it is important to drill down to the related questions. These questions can help guide future action if feedback from students suggest areas for improvement.
4. Keep both the likert scale and written comments in mind while reading through the report. High scores (4+) suggest student consensus indicating a strength. On the other hand, low scores (2-) should be considered as an area that requires immediate developmental focus based on student feedback.

B. NOMINATION FOR TEACHING AWARDS

	Response Count
I would like to nominate Leong Wing Lup, Ben for teaching awards	94

Comment
- /
- effective and helpful lecturer
- good sense of humor explain teaching stuff clearly
- Refer to strength
- always seen to be providing help to the students in need, even up till late night
- He made CS1010S the coolest module I ever take.

Engaging
Good sense of humor logical thinking
Receptive to feedback. Takes value in his student's improvement for his module. Changes his module to suit the current mood of learning. A different professor that does not care only about his research but support his student's learning.
NA
Clear knowledge of subject
-
He is super smart and he has a good sense of humour. He is also very cool.
very engaging classes
NA
He is very fun to listen to, but also very smart. He makes it clear that his main goal is for our learning and not for our cap.
He is funny
Teaching new concepts
He teaches very fast.
He has an interesting way of thinking
Very passionate about teaching. Really creative and interesting.
Clear, concise explanation on concepts

Comments
Able to figure out student's weaknesses and help us with their problems
He is able to connect with students and understand what the students are thinking
Brings up examples and problems that use the concepts we had just learnt
Communicates clearly and makes his expectations clear.
–
He is extremely clear on his content delivery. Although, due to the nature of the content, certain parts ended up being confusing but was eventually cleared up. In addition, he is very engaging and his life lessons during the lecture breaks and the last lecture were extremely insightful!
Prof Ben is a humorous lecturer who cares a lot about the students. Although I don't enjoy the module I can see that they a lot of effort in this module. They are very passionate in teaching and strives to make this module as fun as possible for the students. Prof Wai Kay and Prof Ben are consistently trying to improve the modules.
He is very funny and patient which makes the topic much more fun, and goes through the content thoroughly , even conducting remedials for students showing his care for them
He knows his content.
He is clear and concise.
Clear and concise
Prof Ben sets high standards for all his students and provides good lecture material
He is very passionate about what he is teaching, he also understands the content very well
Really good and experienced prof, actually so good, i feel really dumb, promotes critical thinking and encourages people to think even deeper instead of just plainly laying things out...
Very realistic and practical
Clear teaching methods
professional and interesting!
He is good at explaining concepts so that everyone understands.
Prof Ben is someone who knows the content really well and challenges us to think further.

E. AREAS FOR IMPROVEMENT

What improvements would you suggest to Leong Wing Lup, Ben?

Comments
slow down speaking speed
CS1010S should be 6MC. Prof Ben should take into account weaker students ability. Not so easy cause of stronger students
NA
-
Maybe speak a little bit slower.
nil
NA
Try not to think faster than you speak, if not the words get jumbled up when you talk too fast
Should use updated examples to teach. Nobody watches Star Wars now. You should change the example instead of asking us to watch the movie.
Maybe the course can be taught more slowly.
NA
Provide clearer / more explicit answers when students ask a question
NIL
nil
More focus on the basics and lectures feel rushed
Look out more for students struggling with the module.
-
Nil
I think the CS module is really very tough and hard to catchup because so much content is squeezed into weekly lectures haha maybe can slow down the pace a little!
Don't lecture so fast
His pace is a little too fast to catch up.
Nil
Prof Ben may come across as arrogant or being unable to empathise with his students, especially to those who are not already adept at programming
Nil, I am very satisfied with the module
No need improvements
-perfect-
can give us more homework to do!
NIL
Sometimes I felt that lectures delivered a lot of content in one session and the pace was quite fast. Although i understand the manpower challenges, it would be nice to slow lectures down a little.
Can speak in a slower pace,sometimes hard to catch what he says
NA
NA

Comments
He can be less arrogant and stop saying How cool is that? in lecture.
–
make questions don't hard hard liao :')
speak slower
examples used for lecture should be easier to understand
–
–
–
Nil
Can speak a bit slower
NA
–
Nil
NIL
Kind a little bit
–NIL–
nil.
I feel that the lecture notes, sometimes are too difficult for us to understand, and Prof expect us to know it already.
I want to be taught by Prof Ben more often :D
Slower speaking speed?
Nil
Pace the lecture better, sometimes rushing the last few slides cause of time.
There are times when I feel he glosses over certain concepts too quickly – but the case can be made for the idea that it can be covered more in depth during recitation too
Can go slower in lectures
Sometimes the materials were gone through too fast, can slow down a bit
NIL
nil
Sometimes he may speak in a condescending tone
–
Speak more slowly
NIL
NA
Not very fluent in speech delivery.He has a tendency to mix dialect/singlish with english during lecture.
Nothing.
Maybe try not to rush things at the end of the lecture.(cut short on the video breaks)
He should give examples of difficult materials starting from the easiest to comprehend to hardest to grasp. Using this staircase teaching method, difficult materials can be easier understood by students.
Slow down a little
NA
Provide some model answers. I only learnt the "proper" ways after reading the exam model answers.
NA
nil
nothing
Cater to struggling students at an earlier timing.
Continue your good work!
could you speak a little slowly

Comments
I feel that there are still some times where concepts are glossed over, where some students could lose track of what's being taught. I feel that the CS1010 lecturers could also be more understanding of the students who are struggling to keep up with the sheer workload of CS1010 (on top of other modules), whilst having no computing background – sometimes the work and the rigour can dampen the spirits quite a bit
be more sympathy towards those less-talented ones.
Slow down a bit
–
NIL
nil
slower pace
Nil
NIL
It might be less pressure on the students while learning if the professor didn't talk as if the students should already know everything.
–
Needs to stop being critical to students. Students are first time learners. cannot expect to know everything.
he is not very polite to students and has an arrogant tone which is extremely off putting

F. SELF-REFLECTION

1. When comparing these results to the previous year's results, what areas have shown improvement?
2. What areas remain to be improved and what are the necessary steps / actions to do so?
3. Are there colleagues who could potentially guide me?
4. Are there issues that require departmental or institutional support?
