

Tutorial #1 (for week 3)

(Jan 21, 2003)

15th January 2003

The following questions will be considered during the tutorial sessions on Tuesday...

- Q1:** Find an example of a CGI delivered application/form on the Internet. Give the URL, a brief description, and state *why* you believe it is a CGI-based application.
- Q2:** Find an example of a GUI blooper, or hall-of-shame entry. Briefly describe both *it*, and the *fixed* version. (Before and after pictures/screenshots and brief description).
- Q3:** Research: What is Norman's¹ "Theory of Action", and what possible practical use can it have?
- Q4:** For the X code on page 36, for each call to the X toolkit (Xt) give a brief description of the function of the call, along with it's parameters.

If there is time, the tutor will spend some time helping with Assignment #1.
