

CS5248 Systems Support for Continuous Media Quiz 4

Answer the question in the space provided. Please be precise, succinct, and write eligibly. Please state your assumptions (if any) clearly.

1. Banerjee's NICE multicast scheme do not consider the case where nodes can have different amount of bandwidth and computing resource.

How would node heterogeneity affect the performance of NICE? Briefly describe how you would modify NICE so that the overlay tree constructed takes heterogeneity into consideration.
