Subject: please circulate a RF job info to all PhD students of your school

Hi Limsoon,

Please help me circulate the following job info:

This job will be working on data mining/machine learning algorithms to solve protein structural bioinformatics problems. The biological hypothesis in the project is called ``double water exclusion". You are expected to use computational algorithms and mathematical models to tackle the problem. You will be also flexible to use your own computational ideas.

The position can start as early as in December, 2008. The salary package will be very attractive and competitive.

Please contact A/P Li Jinyan (jyli@ntu.edu.sg) for further info.

Thanks.

jinyan
