**Subject:** Genomics & computational biology positions at IMB

Dear colleague,

The Institute for Molecular Bioscience at The University of Queensland (Brisbane, Australia) invites applications for research positions in Genomics and Computational Biology. Details are at these links:

<http://www.seek.com.au/job/25557370>

<http://uqjobs.uq.edu.au/jobDetails.asp?sJobIDs=495295&lWorkTypeID=&lLocationID=&sJobNo=laboratory+head&lCategoryID=&lBrandID=&sKeywords=laboratory+head&stp=AW&sLanguage=en>

The Laboratory Head / Group Leader position(s) is/are available at any level of seniority, although we may give preference to applicants no more than 10 years out from his/her PhD. Successful applicants for a Senior Research Associate position would normally be 5-8 years post-PhD, but this is not a fixed requirement.

IMB particularly invites applications from women.

We welcome informal enquiries; all correspondence will be treated in the strictest of confidence. In particular, current employers and referees will not be contacted without the applicant's explicit permission.

Please bring these opportunities to the attention of any qualified researcher who might be interested. Feel free to forward this email.

With kind regards, mark
