

Software Programmer/Engineer

The Translational Interface Programme in the National University of Singapore Oncology Research Institute is looking for a skilled software programmer to join a multidisciplinary team to aid in the development of clinical bioinformatics software for Medical research. Job responsibilities include:

1. Support and resolve application problems by investigators.
2. The development and maintenance of structured databases and software systems.
3. Development and maintenance of web interactive and graphical interfaces.

Prerequisites:

1. A team player keen to join and work with a multidisciplinary team to develop bioinformatics tools to be used in industry and medical institutions.
2. Some sound knowledge and practical experience in Windows, Unix, Linux, C, C++, JAVA, PERL, HTML and web programming.
3. Complex relational database creation skills necessitating the knowledge of MySQL, Excel or Oracle DB.
4. Understanding web-based and client server application development and maintenance.
5. Outgoing personality with good communication skills.
6. Experience with biomedical terminology will be considered an advantage.

Interested parties please submit a cover letter and resume, including the name and contact details of 3 referees, to Ms Selena Gan, Manager, Oncology Research Institute (nmiv29@nus.edu.sg).
